EDUCATION

Third year at School of Electrical Engineering, University of Belgrade	Belgrade, Serbia
Bachelor of Engineering - Software Engineering	GPA: 9.81/10

EXPERIENCE

Software Engineer Intern Microsoft	Belgrade, Serbia Jul 2025 - Oct 2025
Developed a version of DRI Copilot for Azure SQL Incidents by creating AI Agent skills for internal Azure SQL tools. Designed multi-agent workflows to automate incident resolution. Identified and fixed bugs in DRI Copilot and improved onboarding documentation.	
Undergraduate Teaching Assistant School of Electrical Engineering, Department of Computer Science	Belgrade, Serbia Oct 2024 - Present
Graded assignments, projects, and exams for multiple undergraduate courses, including Algorithms and Data Structures, Computer Architecture, Object-Oriented Programming, Databases, Programming, and Computer Networks	

PROJECTS

Versatile Multi-RAID Implementation	GitHub
Engineered a robust RAID module for the xv6 operating system supporting RAID0, RAID1, RAID4, RAID5, and RAID0+1. Designed dynamic RAID type switching, automated disk repair, and maximized concurrency for enhanced system performance. Additionally, integrated lazy initialization for RAID4 and RAID5 to boost system responsiveness and efficiency.	
Audio Stream Management System	GitHub
This project features a comprehensive audio streaming platform. It integrates a Java-based client application that issues RESTful requests to a central server, which in turn coordinates three specialized subsystems via JMS. The system manages user profiles, audio recordings, categories, subscriptions, and user interactions (ratings and favorites), all backed by a MySQL database.	
Multithreaded Preemptive Kernel for RISC-V Architecture	GitHub
The kernel supports multithreading with time sharing and preemptive scheduling via timer and keyboard interrupts. It features a custom memory allocator, thread management, and semaphore-based synchronization, all built from scratch without relying on host OS services.	

AWARDS and HONORS

Silver Medal, National Mathematics Competition for High School Students	May 2022
--	----------

SKILLS

Technical : C/C++, Java, Python, SQL, Git
Language : English, Serbian
